

THE WORLD OVER
TUNNEL IN HEAD FROM BULLET
MICHIGAN HEART BALM BANNED
KING SAYS GIVE ALTA. CHANCE
HELPS SELF TO SEIZED LIQUOR

EDMONTON—Keith Watson, 17-year-old boy of this city, is going about with a "tunnel" in his head. While hunting, he was struck by a rifle bullet which entered his forehead between the eye and came out on the top of his head, leaving an inch and a half tunnel in the skull and a half inch hole in the forehead. The bullet, which was reported to be heading north.

DETROIT—Cash consideration for broken hearts became a thing of the past in Michigan last week. Action for breach of promise to marry, criminal conversation, and other suits with minor exceptions, alienation of affections, all were put under the ban at the new act became law. A legislature which evidently agreed that in 999 cases out of 1000 women who claim to have broken hearts actually have itching palms—not only prohibited such suits but provided very heavy penalties for violations of the new law.

LEAKS, Sask.—Social Credit will spread like wildfire over the whole world if Premier Abernethy can make his scheme work in Alberta. Liberal Leader Mackenzie King believes. There is no need of a Social Credit party in federal politics, he declared, for if the Alberta experiment is a success every political party in Canada will speedily adopt the new doctrine. In the meantime the course was to give the new Alberta government every opportunity to test out its plan and to avoid complicating federal issues by electing Social Credit candidates who would never form a government at OTTAWA.

WALLACEBURG, Ont.—The capacity of Harold Brown and his ingenuity in fleecing bottles of confiscated beer in Wallaceburg police station brought him into court to face the charge of intoxication. Arrested a few days before for questioning about a forced entry into a butcher shop Brown was allowed the run of a room in the police station instead of being locked up. In a cell he spilled a quantity of home made beer police had seized. The locked cell didn't fool Brown. Using a mop, he reached through the bars, tipped over a bottle at a time on the soft end of the mop and dragged it in. In this way he disposed of 14 bottles with propitious effects.

COMMERCIAL FISHING SEASON IS EXTENDED
Extension of the commercial fishing season from September 30 to October 4 has been granted by the government. Following an application of fishermen in the province. This action has been taken, said Premier Abernethy, in view of the backward season.

There's one comfort about a cafeteria—if anyone's finger is in the soup, it's your own.

CONST. JAS. STEEVES LOST CAR BY FIRE LAST WEEK; INJURED, BROKEN GLASS

Jas. Steeves, popular constable of the R.C.M.P. at Carbon, had the misfortune to lose his car by fire last Friday afternoon, about 10 miles south of town, and a mile west of the center of the city.

It appears that the engine of the car back-fired, igniting the gas in the carburetor. The car was being driven at the time and before the fire was noticed it had spread to the front part of the car.

The entire interior of the vehicle was burned, but tires and engine may be salvaged. A most unfortunate part of the accident was the fact that Const. Steeves while attempting to quell the flames, in some manner put his hand through the windshield of the car, severing an artery in his wrist. Lawrence Pison, who was with Const. Steeves at the time, accompanied him to the colony, where Dr. McFarlane was summoned to administer aid to the injured member.

ALBERTA RICH IN DINOSAUR REMAINS

That Alberta possesses the richest field of fossils of dinosaurs in the world, was the statement made by Charles M. Stenning, field man for the Dominion geological survey and collector of fossils for the National Museum of Canada last week in Calgary, pointing out that Alberta has 45 different kinds of the reptiles in the Red Deer Valley, which had not been discovered elsewhere.

There were more than 400 different kinds of dinosaurs, Mr. Stenning said, and they ranged in size from the size of a cat to more than 100 feet in length. Their remains have been found in different parts of the world and the larger specimens were unearthed in Africa.

No dinosaur eggs have been found as yet in Alberta, he said, and he believed the reason for this was that they were accustomed to going to the higher land to hatch their young. The region around Steevehill being low, marshy swamps.

Recent light on the age of the remains tended to show that they were very much older than at first thought. While such prices are being offered, 1,000,000 years ago, their age. It was now thought more likely to be 60,000, 600 years ago that these reptiles had lived on the earth. The determination of their age was not a matter of guess work, but was today caused by a study of radiocarbon.

Changes in the climate and geographical conditions on the earth had brought about extinction of the animals, he believed, which was unable to adapt itself to changed conditions.

SOCIAL CREDIT CANDIDATE TO OPPOSE R.B. BENNETT IN WEST CALGARY RIDING

Deciding unanimously to oppose Prime Minister R.B. Bennett in West Calgary constituency, the Social Credit party on Saturday named candidates for both East and West Calgary ridings.

Robert Reid, Cremona teacher and farmer and veteran of the South African War and Great War, will carry the party banner in Calgary West, while in Calgary East the party will be represented by John Landeryou, of Calgary.

Reid, together with seven other nominees, was named after the convention had voted unanimously to contest the Calgary West riding in opposition to the prime minister. The vote followed reading of a letter from Hon. William Abernethy, in which he asked the convention to make its own decision in the matter since other parties had already made an announcement for Mr. Bennett's opposition.

NOMINATIONS CLOSE IN 15 ALBERTA RIDINGS SEPT. 30

With advance nominations to take place September 30 in nearly one-third of the electoral districts, final instructions have already been issued to the various returning officers. In 15 electoral districts these advance nominations will close on September 30. In the remaining 167 districts, which include Halifax and Queen's P.E.I., each electing two members to the Dominion house, nominations will take place on October 7th, a week from polling day.

In Alberta advance nominations will be held on September 30 in thirteen of the 17 ridings, as follows: Alberta, Athabasca, Battle River, Camrose, Peace River, Lethbridge, Medicine Hat, Peace River, Red Deer, Vegreville and Wetaskiwin.

CALGARY FALL LIVESTOCK SHOW IN OCTOBER

Junior Activities

There will be two new events for farm girls and boys at the Fall Livestock Show in Calgary this year, one a dairy cattle judging competition for which cash prizes are being offered, and the other, instruction in the feeding and management of baby beef cattle.

In connection with the dairy cattle judging competition, any girl or boy residing on a farm, between the ages of twelve and twenty, may enter. Application form should be filled out and returned not later than October 5th. Girls and boys entered in this competition will meet in the hall over the Administration Offices at the Exhibition Grounds, at 7:00 p.m., on Wednesday, October 22nd. They will be given instruction in dairy cattle judging before going to the ring in the live stock pavilion at 8:00 p.m., to judge a class of animals. The prize offered in connection with this judging competition are:

First—\$5.00; Second—\$2.50; Third—\$1.00; Fourth—\$1.50; Fifth—\$1.00; Sixth—\$1.00; Seventh—\$1.00; and to all other competitors, 50c each. If you are a member of a beef calf club, you will be particularly interested in the lecture on feeding. By attending it, you will receive valuable information regarding the proper manner of starting your calf on feed, and the kind of feeds and feed mixtures most suitable to desirable development and the most satisfactory quantity of feeds to use to secure the best possible results with your calf. This feeding lecture will be held at 7:00 p.m., on Thursday, October 24th. In the hall above the Administration Office at the Exhibition Grounds. You are urged to interest yourself in these two items. They have been brought on the live stock show programme for your benefit.

RAYMOND AGRICULTURAL SCHOOL, MENTAL HOSPITAL

The premier has announced that plans are proceeding for the renovation of the old Raymond agricultural college to provide for the overflow of 100 patients from the Ponoka mental institution during the present winter. This renovation will cost about \$20,000.

BANDIT HOLDS UP TAXICAB DRIVER NEAR DRUMHELLER AND ESCAPES POLICE NET

David Winnick, taxi-driver of Drumheller, failed an attempt of a lone bandit to hold him on Monday morning, when he fled from his cab on the Calgary-Drumheller highway as the bandit ordered him to stop his car.

The hold-up took place near Piper's corner about seven miles west of the City of Drumheller and the culprit fled in the taxi, which was later found near Acme. Immediately police searched the country in the vicinity and watch was placed on all roads.

Winnick had just come on shift at 10:00 a.m. and a few minutes later a man walked in and asked for a ride to take him to a point seven miles west of the city. When asked for a name, the man told him to get out of the vehicle. Before the bandit could get out of the machine, Winnick fled down the highway and away from the car. Coming to a farm house, Winnick phoned his employer and police and search for the lone bandit was started.

BANK OF MONTREAL CROP REPORT AT SEPTEMBER 21

General—Wheat threshing, although delayed at frequent intervals by wet weather, is well advanced in Manitoba, Saskatchewan and southern Alberta. The Alberta wheat crop is of better quality than that of Manitoba, or Saskatchewan. The total wheat yield is estimated at slightly higher figure than of those of last year, but the quantity is low. The production of cereals shows a substantial increase. In Quebec, crops are proving satisfactory though the weather is not ideal. In Ontario, crops in general are turning out well and the tobacco crop is exceptionally good. In the Maritime provinces grain has failed to recover from the effects of late frost and drought in August, but rains have been beneficial to most of the pasture. In British Columbia the crops are mostly proving satisfactory, though they are slightly below average in yield and quality.

Alberta—Unsettled weather in the north has caused delay in harvesting, but cutting is well advanced. Threshing is on half completed in southern areas where the average wheat yield is from 10 to 12 bushels of high grade. Earlier frost damage in the north and northern areas proved worse than was anticipated. Rust has continued to make satisfactory progress.

Saskatchewan—Threshing is general with about 45 per cent of wheat completed. Showery weather has delayed operations. Good yields are reported in portions of northwestern, northeastern, west central and south central districts. Wheat yield estimates exceed those of 1935 but most of the grain is of low grade. Coarse grain yields are better than for some years. Manitoba—Over 50 per cent of the wheat is threshed. Operations have been held back by rain. Yields are small and the quality poor except in small areas in north and south River districts. The estimated wheat production is the lowest since 1909. The coarse grain crops are fairly good.

LIFE IN ALBERTA

Cheer up, grandpa, don't you cry! You'll find diamonds by and by! Abernethy has many schemes Made to arid out brand new bills. He will help you in your cause With his unshared increment. No more worry over bills, Butcher's dues, or doctor's pills. No more paid over every cent! Leave that all to government. Dine on squid and caviar. Sport a streamlined motor car. When the blizzard hits and bit, off to Palm Beach shall fly. Lead a life on pleasure bent. (You must spend every cent!) Whoops, grandpa! Stay alive. Soon you'll get your dividend. —Viking News.

Sugar Beet Crop

Total acreage in sugar beets in southern Alberta this season is approximately 14,000 acres. The anticipated crop is about 150,000 tons, a record from last year's record crop of 270,000 tons.

PEACE RIVER BRIDGE TO BE REBUILT IMMEDIATELY

Reconstruction of the main traffic bridge over the Peace River at Peace River town will be carried out by the provincial government immediately, according to Premier Abernethy.

It has been stated that consideration was still being given to what action would be taken regarding the engineer's report advocating relocating the 26-mile section of highway along Lower Slave Lake and the morning of the Slave Lake village.

ALBERTA NEWS NOTES

Assistance to Exhibitors

Alberta government will once again assist small exhibitors at the Toronto Royal Fair and Chicago International fair. For the royal fair entry fee and shipping costs to Toronto will be paid. Entry fees must be paid first by the exhibitors and will be refunded on presentation of receipts. No assistance will be given in regular open classes.

At Chicago International fair and main show, where Alberta has made such an outstanding record in seed crops for the past 15 years, the government will pay the shipping costs on approved exhibits. Prime money in the form of cash prizes will be awarded by Alberta exhibitors will be duplicated by the provincial government. In the case of one or more exhibitors' championships being taken, a special bonus of \$50 will be granted, which will be increased to \$100 in the case of championships in wheat, oats or barley. The provincial field crops branch will as far as possible superintend the arrangements for the exhibits. The exhibits of seed grain are to be prepared in time to be forwarded to Chicago by freight. On those going by express, half the cost only will be borne by the government.

On the basis of a yield of 5 bushels to the acre (the long time average for Alberta) the fall losses in the province this year totalled 7,200,000 bushels. Some 600,000 bushels have been destroyed by hail storms. There is nothing quite so devastating as a heavy hail storm and nothing so utterly discouraging to a grain grower, the more he may see a splendid stand of grain ripening in the sun and the next a mass of destruction.

Farmers Attention!

DESTROY GRASSHOPPER EGGS

BY FALL CULTIVATION

Reports indicate that hoppers are very numerous this fall, as owing to late hatching of eggs when crops were well advanced, the farmers underestimated the numbers present and did not spread built in sufficient quantities.

CULTIVATE STABLE NOW.

For further information apply to: O. R. LONGMAN, 2890 Field Crops Commissioner, Edmonton, Alberta.

RAIN AND DAMP WEATHER DELAYS HARVESTING FOR A FEW DAYS THIS WEEK

With practically all grain cutting in the district completed, and about half of the threshing done, rain on Monday delayed harvesting operations, and was the first time since cutting commenced that a break in operations has occurred. A real heavy fall has been experienced to date and another ton days of warm dry weather will see practically all grain threshed in the district. Yields of grain vary, but it is anticipated that the average will be close to thirty bushels or more in this part of Alberta. Some farmers report that yields have gone as high as 25 bushels to the acre in the south, and others in the north claim that yields in a few cases will run to thirty-five bushels.

THREE HILLS PRESBYTERY MEETS AT ACME

The Three Hills Presbytery met in the United Church, Acme, last Wednesday, September 15th. Much important business was transacted during the afternoon session and a very educational and profitable time was spent.

A public meeting was held in the evening at 8 o'clock when the speakers were Rev. Wm. Lauder, M.A. of Carbon; Rev. R.H. Hibbert, and Rev. G. Powell, D.D. These addresses were very interesting and much enjoyed.

The session passed a cordial vote of thanks to the congregation for their hospitality and for accommodation provided for the members staying over night; also for the Ladies of the Aid for the splendid luncheon and dinner served at 12 and 6, this being greatly appreciated by the members of the session and the delegates—Acme Sentinel.

Adds Zest to the Meal

To Burn Or Not To Burn

There will be few people in Western Canada, whether farmers, business men or wage earners who will quarrel with the policy which resulted in the announcement of the Canada Grain Board's establishment of a minimum price of 87½ cents for No. 1 Northern wheat f.o.b. Fort William.

Regardless of political affiliations or economic beliefs the general public in the west greeted the announcement with approval as soon as it was made and, it is to be hoped, it will be accorded general backing in the east as well.

But the extent to which this policy will ensure to the benefit of Western farmers, who are hard pressed as a result of a prolonged period of drought, followed this year by a most disappointing situation as a result of wide-spread ravages of the wheat crops by rust, will depend upon the price pressed against, at the time of writing, are expected to be announced any day.

As harvesting and threshing operations progress, the amount of damage from rust is being daily revealed as a disaster of immense proportions, and while estimates of the extent of the loss sustained by farmers in Manitoba and Saskatchewan vary from day to day, it is quite apparent that the final figures will show a loss of great magnitude.

The rust which invaded large tracts of the best wheat growing areas of the west with such devastating effect, has not only reduced yields of what earlier in the season promised to be abundant crops but it has depreciated the grades to an extent comparable with the lowered yields.

At the moment there are thousands of acres of low grade wheat standing in the field awaiting the time when the grain is sufficiently dry to ensure a good burn because it does not pay to cut it.

Before taking this drastic action to destroy a lot of grain which conceivably may be of some use to the farmer, the grain should be well advised to at least await the promised announcement of spreads prices. It is quite possible that the spreads may be set at such figures that even the low grade wheat can be threshed and stored on the farm without too serious loss to the grower.

The Federal government has recognized the loss sustained by farmers through drought in the past few years as a national calamity and it is surely reasonable to expect that the loss sustained by farmers this year will be regarded in the same category and that recognition will be given to the fact when minimum prices for the lower grades are set.

No one can gainsay the statement that the blame for damage by rust cannot be laid at the farmer's door. Rust damage is just as much a national calamity as the drought loss of recent years, and, being the case, there is every reason why the national purse strings should be loosened to relieve the predicament in which such a large number of Western farmers find themselves with winter knocking at the door.

It must be remembered that the grain about to be delivered to the farmer has already cost the farmer something in outlay and labor and would cost more if it were cut, threshed and hauled to the elevator.

Unfortunately the present market price is too low to cover all these costs, without taking into consideration any margin of profit for the farmer who raised the grain.

If the crop is destroyed by fire not only does the grower lose what he has already put out in cash and labor, but it represents a loss to the country at large. It might be well worth the country's while to advance the farmer at least sufficient money to save the grain by way of a fixed minimum price, thus salvaging what has already been spent on the crop and perhaps saving what might otherwise have to be expended later in the form of relief.

Such a measure might well be regarded in the light of a partnership between the individual and the nation for the mutual benefit of both.

There is also the question of the effect on the morale of the unfortunate grower. After losing a series of crops from drought the economic necessity of turning a crop which was very long ago so promising must have a disheartening effect on the stoutest heart. If this effect can be averted without serious financial loss to the country, it may be well worth the expenditure.

Flies Prefer Orange Color

Primrose Yellow Is Second Choice

And Carmine Third

It's this way with flies—they'd rather sit on an orange than a cucumber. If the choice depends on color, such was the deduction announced at the University of California recently as a result of scientific observation of color preferences of multitudes of flies. A huge checker-board with eleven-inch squares in various colors was hung up in a dairy barn of the university's college of agriculture. The flies were invited to come and make themselves at home. For three months they sat on while Lester J. Berry, graduate student in charge of the experiment, and his aides kept watch. The tabulated results announced by Berry follow: Not less than 10,572 flies parked on the orange; 7,000 on the yellow; only 2,067 sought out the green. Primrose yellow drew 6,541; carmine, 4,415; light blue, 3,480; and white, 2,560. More esthetic flies went over coral red and pink.

A New Racket

If you get a letter telling you a relative has died and offering \$30 be forwarded to cover cost of a certified copy of the supposedly dead person's will, the chamber of commerce of Hamilton, Ont., advises the recipient not to answer it. They explained it is the latest swindle racket operated from Montreal.

Buried Eloquence

The mayor had just laid the foundation stone of a new wing for the hospital, and the spectators awaited his speech.

"What can I do?" cried the harassed mayor to his wife. "I've laid the stone on top of it."

The great problem of taxation is how to make the other fellow pay.

Would Increase Efficiency

Scientific Investigators Recommend Five Light Meals A Day

When you eat a meal, what is the effect on your work? Scientific investigators have repeatedly investigated, and repeatedly answered that the effect is bad. But their studies have generally been based on the assumption that the meal is about one-third of your daily diet, since you eat three meals a day. Now Howard W. Huggard and Leon A. Greenberg, in a book, "Diet and Efficiency," report that the best schedule is five a day, all comparatively light, and that after a light meal in mid-morning or mid-afternoon your efficiency is increased 10 per cent.

This conclusion refutes the older American tradition, which had its basis in farm life. But it is in accord with the habit of many office-workers, and it corroborates the advertising agencies of several candies and soft drinks.—Business Week.

Civil Service Betterment

Given the full co-operation of civil service organizations and the civil service generally, Charles H. Brand, chairman of the civil service commission at Ottawa, expressed confidence that betterment of conditions of government employees would come in the future.

A Good Suggestion

The young hero at the party, who was doing his share of the entertaining, had already exceeded the time-limit.

"Now, continuing my imitations," he said, "I can mimic any bird. Will someone bring me a bird, please?"

"A homing pigeon," suggested one of the company.

A fly will travel 30 miles in search of food. 2116

Safety Campaign

Automobile Fatalities On Roads In British Isles

Bad as the slaughter on the roads continues to be, we do not think there is any ground for the gloomy view that the safety campaign is more or less played out. It takes a long time to build up the habit of self-protection amid the dangers of the road, says the London Daily Herald.

The fact that fatalities and injuries are below those of last year is pretty convincing proof that safety habits are gaining ground, and there is no good reason whatever for believing the improvement has ceased. Indeed, the ministry of transport's analysis of accidents by age-groups indicates once again where education and propaganda should be directed with special energy. Only one-tenth of the killed were 15 to 24. One-third were over 55.

One half—a tragic figure—were under 15. It is clearly the young and the old who are in the greatest danger, and upon them should be concentrated the warnings and instructions of the campaign.

Infant Prodigy

Twenty Months Old Child Has A Vocabulary Of Little Words

Little Jackie Grub, who can rattle off more words and sentences than a youngster three times his age, said "holly smoke!" and set about showing Dr. Brynne Brynne of Minneapolis, how a left-handed 20-month-old boy speaks the English language with the 1,100 words he knows. When he got through it was Dr. Brynne, director of the University of Minnesota speech clinic, who said, "Holy smoke! He is distinctly a genius at 20 months."

FASHION FANCIES

930

SKIRT, BLOUSE, JACKET SUIT—DAUGHTER JUST AT AGE TO APPRECIATE SOMETHING SMART FOR FALL DAYS

By Ellen Worth.

Growing daughter will just adore a little three-piece suit like this for first fall school days. It's so very practical, too, besides being smart! Brown and sage checked angora woolen made the model pictured. The detachable collar and cuffs of the jacket, matched the plain brown jersey blouse. Plain aqua blue cotton broadcloth skirt would also be lovely by way of a change.

Dark blue is effective with plain bright red cotton used for the detachable collar and cuffs of this lovely model.

Style No. 930 is designed for sizes 10 and 14 years. The skirt is 30 inches 2½ yards of 30-inch material for blouse and jacket and 1½ yards of 30-inch material for blouse, collar and cuffs with 1 yard of 4-inch ribbon for belt.

Patterns 12 each. Address mail orders to: Pattern Department, Winnipeg, Newspaper Union, 170 McDermid Ave. E., Winnipeg.

Our Fashion Magazine is beautiful and contains the latest fashions for your copy today. The price is 10 cents.

Parliament In Jerusalem

Arabs Expect Early Establishment Of Council In Palestine

Early establishment of a legislative council in Palestine is considered so certain Arab leaders are merely awaiting a British "Order in Council" establishing the parliament before discussing their position. It was reported by Mirat-Ash-Sharqan semi-weekly Arab newspaper. The Jews of Palestine have made it clear that under no conditions will they accept a legislative council at this time.

Bomb Shelter De Luxe

City Of Paris Making Provision For Air Raids

Thirty feet under the ground in the Avenue Foch, one of the most fashionable residential streets in Paris, a model concrete shelter has been constructed for use in the event of air raids. The shelter consists of several rooms equipped with all conveniences, including apparatus for detecting the presence of poison gas outside. It will serve as the model for many more which are to be built by the city of Paris. It is built under a mansion. Its roof is a block of concrete six feet thick. Above this is 10 feet of earth then a one-foot thick block of concrete, and finally another layer of earth. Two stairways lead to the shelter, and at the foot of each is a steel and concrete door weighing a ton. There are special rooms for giving first aid to injured persons, machine rooms for light and ventilation purposes and storerooms. Although it is connected with the city's regular light supply, the shelter is supplied with generators, electric batteries for providing its own light if necessary.

China Has New Tax

After Next May Those Who Cannot Read Will Be Fined

China has announced that after May 1, 1936, anyone in Nanking between the ages of six and fifty who cannot read will be fined. Appalled at the ignorance of the people of the capital, the Chinese authorities have issued a primer of 10,000 characters and ordered students to teach the ignorant from it or give up hope of graduation. As half the population of the city cannot read, the students will be kept busy until the new law goes into effect. The police will be the official examiners, and will stop anyone they wish who if he fails to read the primer, will have to pay the equivalent of half a cent on the spot. The penalty is called the Ignorant People's Tax.

Discovery About Artist

Michelangelo Had Hundreds Of Concealed Faces In His Paintings

A discovery that hundreds of concealed faces look down from Michelangelo's paintings in the Sistine and Pauline Chapels of the Vatican has been made by a Rome priest and art critic, Father Giuseppe Parroni. It was in this way, Father Parroni says, that Michelangelo pilfered his comely or immortalized his friends. Cardinals and some of the great men of the papal court figured among Michelangelo's enemies. Father Parroni mounted a lat scaffold and took minute photographs to complete his discovery.

Prince Starts New Fashion

The Prince of Wales started another craze in men's fashions when he appeared on the waterfront at Cannes, France, with a plain brown belt fastened with a five-inch anchor. Dealers, swamped with orders, rushed demands to Paris wholesalers for thousands of similar belts. The heir to the British Throne wore the belt with a white sport suit.

It's bigger! It's richer!
It lasts longer, too.
This slow-burning Dixie
Saves money for you.

THE PLUG SMOKING TOBACCO

Jelly-Fish Kills Man

Sting Of Giant Jelly Proved Fatal To Italian

A sting by a giant jelly-fish has resulted in the death of Salvatore Cantarella, an Italian cane farmer near Brisbane. He was bathing at Coolgarra Beach when he suddenly cried out loudly for help. His companions rushed out and pulled him ashore. He was given artificial respiration and restoratives but in vain, and he died on his way to the hospital. Tentacles were found on his body and it was at first thought that he had been attacked by an octopus. Later, however, it was found that he had been paralysed by a giant "Portuguese Man of War," a type of jelly-fish that is found along the Queensland coast. These jelly-fish, often have tentacles up to 12 feet long, and their stings are capable of causing temporary paralysis.

Would Increase Sales

If every little market in the land and every large one could furnish its customers with top quality eggs, which could be bought with assurance just as good milk can be had at every corner store, we have no way of estimating what a benefit every producer of eggs would receive.

A species of honey-making wasp is found in Mexico and the southern part of Texas.

The most useful citizen is the one who creates most jobs.

Don't forget that an honest man never has to proclaim the fact.

Lost Books Found

Volumes Missing For 41 Years Returned To Prince Albert Man

Two books which Alderman G. H. Carr of Prince Albert believed he had lost in Greenland 41 years ago when a member of Admiral Peary's 1895-94 North Pole expedition, turned up recently—in the mail.

Mrs. Carr was notified a parcel of books awaited him at the customs office. On opening the parcel he discovered his two volumes of Bristley's "In Darkest Africa" which he had read during the long Arctic night while the polar party waited to begin the futile dash for the North Pole.

They had been discovered among Peary's effects and forwarded by the admiral's daughter, Mrs. Edwin Stanford, of Washington, D.C.

Large Sum For Relief

Pussy Horn Belonging To King Canute Sold In London

Symbolizing the holding of land by the tenure of the horn, or corrag, the Pussy Horn, a remarkable relic of King Canute was sold recently in London for \$5,500. It was a heirloom of the Pussy family. In 1565 there was a dispute in the courts for the possession of the Pussy Horn. It was produced and identified as the one by which Canute conveyed the manor of Pussy (Berkshire) 700 years before. The horn was the alarm to be given on the arrival of the King's enemies. It will go into a private collection of antiques.

Some varieties of softwood are harder than hardwood.

NATURE'S OWN SALT-TREATED SPEEDWAY

While Canadian engineers and research scientists have been working out methods of creating good highway surfaces by treatment with common salt, the world's most famous race-drivers have turned to natural salt-treated speedways for their world record attempts. Photo shows: A stock car speed test on the new speedway of the great salt desert in Utah where Sir Malcolm Campbell in his famous Bluebird set a new world's record and bettered 200 miles per hour.

You'll save its modest cost before half the roll is used. That's because the heavy waxed paper keeps left-overs fresh, moist and flavorful. Ask for Appleford's Para-Sani because of the exclusive knife edge cutter on the box.

LICENSED AUCTIONEER

S. F. TORRANCE, Clerk, PHONE 19

John Vaughan of Calgary, who left Carbon about eight years ago, has returned to Carbon for the winter months. Mrs. Vaughan and children will arrive shortly and they will make their home in Carbon again.

Mrs. W. Poxon, Mrs. H.N. Elliott, Mrs. A.J. Wright and Mrs. R.J. Bonnett motored to Drumheller on Monday of this week.

Work on the new bank building is progressing favorably and the structure is almost ready for stucco.

Mr. Johnston, the Social Credit candidate will hold a meeting in Carbon on October 2nd.

Subscription accounts to The Carbon Chronicle are being sent out this week. If you are in arrears kindly try and pay up at an early date.

Mrs. Van Camp is demonstrating "Fog Haking Powder" at the Farmer's Exchange this week.

Don't forget the dance to be held in the Farmers' Exchange hall, Carbon, on Friday night of this week. This dance is being sponsored by the Carbon Young Men's Club and music will be furnished by Joe Kane's White Tux Orchestra of Drumheller.

JOE LOUIS KNOCKS OUT MAX BAER IN FIFTH

Scoring a technical knockout in the fourth round of the scheduled ten-round bout at Madison Square Gardens on Tuesday night, Joe Louis was declared the champion less than ten minutes after the boxers had entered the ring.

Louis, known as the "brown bomber" had little difficulty in defeating his opponent, and at no time during the bout did it appear that he would be conquered by Baer.

About 100,000 sport fans witnessed the bout, with seats ranging in price from \$3.50 to \$25.00. Some fans even paid as high as \$250 for a seat, a high price for ten minutes entertainment.

THE IDEA IS TO KEEP GOING

In days of yore when pioneers were travelling across country on horseback if a horse stumbled and broke a leg the rider would get another horse and keep going.

When business men were using places by train in the gay nineties and were in a wreck, they caught the next train.

When people have an automobile accident they summon another car and keep going.

It must have been a similar frame of mind that Dr. F.R. Townsend of Penion, Man. fame said "Let's have another plane" after the one he had been riding in crashed into some trees and fence posts last week.

New Films For Alberta

New national parks films for public showing have been added this week to the film library of the provincial publicity bureau, under the co-operative arrangement with the national parks department at Ottawa. Among them are included a number of films taken in Alberta last fall by the national parks department movie cameramen. One of the films is entitled "Stalking Big Game," showing movies of the wild animal life in Jasper Park. Another film is "The Trail to Jasper" showing views of Edmonton and the trip to Jasper Park and the scenes in the park. A third is a new film on Waterton National Park, and a fourth is a 16-mm film taken at Lake Louise. The provincial bureau now has a library of some 23 films.

NOT SO SURE

Certain English insurance companies which have been selling policies against an Rube-Rubinson have been discontinued the practice. These few who still sell ask prohibitive rates.

"This pie is burnt to a cinder. Didn't you follow the cook book?"

"No. This is my own creation."

The world is like a box of straw-berrries. The big ones get on top while the little ones are crushed on the bottom.

CAR UNSAFE—NO PERMIT

A weapon to fight the undoubted menace of old cars on the highway is being placed in the hands of police by various provincial enactments, and a desirable reduction in the number of mechanically defective motor vehicles in Canada may result. Province of Ontario passed Section 5A to help control "old crooks," power being given to order defective cars off the roads.

"In the opinion of the department," says a bulletin, "the operation of defective vehicles is so serious an offense that examiners of applicants for drivers' licenses are instructed to refuse a license to any driver who presents himself for examination driving a mechanically unsafe vehicle."

Not only in safety but in production volume as well. Refused permission to drive the old "relic" must applicants will proceed to acquire. If not a new car, at least a later model within the police meaning of "mechanically safe vehicle."

WHY EDITORS DIE YOUNG

Typographic error in Kansas Paper: "Robert Jones has been in Hinchin-ben since last Tuesday where he went to have a tooth extracted," the Sterling, Kan., Bulletin reports. "They found the tooth so imbedded in the gum that it was necessary to take him to the hospital."

THE CARBON CHRONICLE

BEER is BEST

LOOK AT IT FROM ANY ANGLE—BEER IS BOTTLED HEALTH. THE CHOICEST "MALTING QUALITY" BARLEY, WHICH IS RESERVE FOR BREWING GOOD BEER, IS IN ITSELF A SOVEREIGN DIGESTIVE. THEN, TOO, BEER CONTAINS A POWERFUL SOURCE OF ENERGY—AND BECAUSE OF THE PLEASANT, BITTER FLAVOR IMPARTED BY THE HOP, BEER IS A REMARKABLE APPETITE STIMULATOR.

A REASONABLE REQUEST

Is multitude numbered among the human virtues?
If so there should be some appreciation for the Wheat Pools in Western Canada today.

No organization has fought harder against the strongest kind of opposition.

And all for the benefit of the grain growers of the west.

No organization has so courageously faced danger and even the threat of extinction.

In order that the grain growers might not be sacrificed to greed and the covetousness of wealth and power.

Continuous criticism has been the lot of this former organization through the latter years.

In which it fought for the grain farmers.

Barely it is not asking too much to suggest that the grain farmers

SHOULD GIVE THEIR PATRONAGE TO
ALBERTA POOL ELEVATORS

It is through deliveries of grain that this organization is kept strong and viable.

Won't you do your part? Every wagon load counts.

ALBERTA POOL ELEVATORS
